WORK EXPERIENCE

VENMO

New York, NY & remote

March 2014 – present

I work on the platform team, on the **Django** codebase. Some of the bigger projects that I either led or worked on include: 1) integrating with Plaid.io for instant bank account verification, 2) designing the new **REST API** for both internal and third-party use, 3) redesigning our user request and funding source logic from the database to the API, and 4) the platform work for Pay with Venmo.

URTAK

New York, NY

July 2012 – February 2013

As part of my studies, I spent eight months doing a coop internship at Urtak in NY, where I was the second engineer working on a **Ruby on Rails** application (embeddable question-and-answer widget), and designed and developed both frontend and backend features.

PROGRAMMING TOOLS AND LANGUAGES

I started programming with TI-BASIC fifteen years ago, and since then have used and learned quite a few other languages. I've shipped **Python/Django**, **Ruby/Rails**, **C#**, and **JavaScript/CoffeeScript** code, built school and hackathon projects in **Scala**, **Groovy/Grails**, **Java/JEE**, **C**, **C++**, and **Objective-C**, and have toyed around with more: **Haskell**, **Swift**, **Prolog**, **SML**, **Lisp**. I like to learn new things, and I learn quickly. I'd be comfortable working in any stack.

At Urtak and Venmo, I've worked with **MySQL**, **MongoDB**, **Redis**, and **Cassandra** data stores, used **JIRA**, **Trello**, **Pivotal Tracker**, and **Asana** to manage projects, **git** and **GitHub** for source control and code review, and **Sentry**, **NewRelic**, **statsd/Grafana**, **Nagios/PagerDuty**, and **SumoLogic** for monitoring and debugging.

EDUCATION

2013 – 2014

M.S. SOFTWARE ENGINEERING

Belfort, France

University of Technology of Belfort-Montbéliard

Valparaíso, Chile

Federico Santa María Technical University
(exchange semester)

2009 – 2013

B.S. COMPUTER SCIENCE

Belfort, France

University of Technology of Belfort-Montbéliard

Trondheim, Norway

Norwegian University of Science and Technology
(exchange semester)

HOBBIES

traveling

22 countries and counting

learning new languages

現在、日本語

cooking

photography

ice hockey & skating
